To Whom It May Concern:

I am pleased to recommend the services of Mr. Jimmy Parrish, a Certified Identity Theft Risk Management Specialist.

As a health care provider we are extremely sensitive to the growing threat of ID theft for both our patients and our employees. Following an intensive internal educational effort our Risk Management team strongly encouraged offering an Identity Theft Program to our employees on a voluntary basis. We looked at several different vendors before selecting the Identify Theft Shield Gold Plan offered by Pre-paid Legal. In addition to continuous credit monitoring this plan offered identity restoration services and other features we thought critical to ensuring peace of mind for our employees.

Our selection was also based on our high measure of confidence that Jimmy was the right person to represent this product to our employees. His presentations to staff were professional and very informative without being alarmist. He was able to speak to Federal Regulations, current risk threats and explain how product features would reduce an individual's exposure. I particularly appreciated that Jimmy was flexible enough to meet the communication challenges presented by a 24/7 healthcare operation. Since our initial implementation Jimmy has continued to provide prompt, effective customer service to individual employees and the HR staff who administer the plan.

I highly recommend Jimmy Parrish and the Identity Theft Shield plan to any employer who wants to provide a quality product and outstanding service to their employees.

Sincerely,

Joni Blakney
